

PRESS RELEASE

Safran and Lufthansa Technik sign MRO partnership agreement for A380 landing gear

Vélizy, March 4, 2020

Safran Landing Systems and Lufthansa Technik AG have signed a long-term contract on A380 landing gear services.

The two companies will combine their respective areas of A380 landing gear MRO expertise at their Singapore (Safran Landing Systems) and London (Lufthansa Technik) facilities to deliver optimized solutions that cover all aspects of the so-called superjumbo jet's landing gear. This extensive asset and MRO (maintenance, repair and overhaul) partnership will provide airlines with a single point of contact throughout the whole commercial and industrial chain, thus a comprehensive A380 landing gear support. Airlines will be free to send their complete set of landing gear to one of the partners, thus avoiding complex processes.

Bruno Chiarelli, Safran Landing Systems Executive Vice President, MRO Division, said: "We are proud to team up with Lufthansa Technik to offer our customers the best solutions in terms of competitiveness and logistics. They will benefit from the combined expertise of an OEM/MRO and a "nose to tail" MRO service provider, both world-class in their field."

Sandra Eckstein, Vice President of Aircraft Systems at Lufthansa Technik, added: "This far-reaching partnership with Safran Landing Systems enables us to offer a complete MRO landing gear service portfolio for the A380. Our customers will benefit from their combined expertise, with Lufthansa Technik also contributing our comprehensive A380 main landing gear support capabilities."

Safran is an international high-technology group, operating in the aircraft propulsion and equipment, space and defense markets. Safran has a global presence, with more than 95,000 employees and sales of 24,6 billion euros in 2019. Safran is listed on the Euronext Paris stock exchange, and is part of the CAC 40 and Euro Stoxx 50 indices.

Safran Landing Systems is the world leader in aircraft landing and braking systems. The company works with 30 civil and military aircraft manufacturers and supports 27,800 aircraft that make 73,000 landings a day.

About Lufthansa Technik

With some 35 subsidiaries and affiliates, the Lufthansa Technik Group is one of the leading providers of technical aircraft services in the world. Certified internationally as maintenance, production and design organization, the company has a workforce of more than 25,000 employees. Lufthansa Technik's portfolio covers the entire range of services for commercial and VIP/special mission aircraft, engines, components and landing gear in the areas of digital fleet support, maintenance, repair, overhaul, modification, completion and conversion as well as the manufacture of innovative cabin products.
